Treadmills

SIMPLE • RELIABLE • COMFORTABLE

THE *vision* *fitness* DIFFERENCE

Whether your vision is a slimmer body, a healthier heart, stress management, or if you simply enjoy exercise, Vision Fitness has the treadmill to help you achieve your goals.

We began as a division of the Trek® Bicycle Company, where we pioneered the development of the smoothest, quietest, and most comfortable fitness bikes available. In 1996, Vision Fitness was spun off by the Trek® Fitness management team to continue to bring to market innovative fitness products. We offer you the same combination of quality, value, and performance that has made our founding company the most requested bicycle brand in America.

This year, we designed our treadmills so that you can first choose the console that meets your needs and then pick the perfect frame. This customizable program allows you to build the treadmill that helps you achieve your fitness goals. Try an award-winning Vision Fitness® treadmill at your local specialty fitness retailer. We are confident you will agree with the thousands of satisfied users and find our treadmills are the simplest, most reliable, and most comfortable you have ever used.

To learn more about Vision Fitness and our complete line of quality fitness products, please visit our website: www.visionfitness.com.

The mission was clear: develop the most simple, reliable, and comfortable treadmill in the market. To do this, we first developed motivational programming to keep you going that extra mile. Then, we studied how we could keep the entire treadmill drive system cool and, thus, more reliable. To achieve this, we designed ventilated motor covers with large, roomy motor compartments. Finally, we redesigned how a treadmill offers cushioning with our eight strategically placed variable-durometer elastomer cushions.

Simple

Our Smart-Matrix™ LED consoles are easy to use, giving you all the information you need to achieve your goals. These consoles feature One-Touch™ Speed and Elevation Quick Keys, making adjustments during your workout simple. Some models even store your workout totals, so you can track your progress over time.

Reliable

Vision Fitness focuses on quality components instead of the fancy bells and whistles. We design our drive packages (motor, lower board, and console) from the ground up for the most reliable performance, rather than buying off-the-shelf components that may not work well together over time.

Comfortable

Our variable-durometer (softness) elastomer system gives you just the right amount of cushioning for a comfortable workout. The softest elastomer is located where your foot contacts the deck; while the firmest is in the back to offer support. For added comfort, our *T9600*, *T9500*, and *T9450* Series have our extra shock-absorbing orthopedic belt.

When Vision Fitness burst onto the treadmill scene, we had the largest and heaviest treadmills designed for the home. We were proud to be called “big” and “heavy” by our competitors. You see, we believe that our larger workout area makes for a more comfortable workout, while our heavy gauge steel frame creates a truly stable workout surface.

Vision Fitness understands that a quality treadmill is a large investment, and it must be reliable and maintainable year after year. Our treadmills have large motor compartments with ventilated covers and 2.5-inch crowned rollers. This keeps the key components (motor, lower board, elevation motor, deck, and belt) running cool and insures a more reliable, longer lasting treadmill.

Vision Fitness® treadmills are significantly different from those of our competitors because we use wax on our decks as a lubricant instead of lower cost silicone. Our low-maintenance prewaxed decks are designed to hold up for hundreds of hours of use (based on user's weight and workout speed) without ever needing service. Wax systems are found on nearly all club treadmills. Wax impregnates the belt and acts as a lubricant between the belt and the deck and has properties that last longer than silicone. Our decks can easily have wax reapplied if needed, and you can flip the deck on our popular *T9600* and *T9700* Series treadmills. When looking for a long-lasting, high quality treadmill, make sure that the treadmill you choose has a wax system and not a silicone one.

2

Our eight-elastomer cushioning system provides so much comfort that you will want to work out longer. The elastomers are strategically placed for extra cushioning where your foot strikes the belt and firm support where your foot pushes off. The stability of the frame is just as important as the cushioning. Our rigid frame construction insures that, when walking or running on the treadmill, all of the cushion is provided through the deck and elastomers. Note the braces on the bottom of our treadmill frames; make sure the treadmill you choose has this feature.

*Cherish your vision and your
dreams, as they are ... the blueprints
of your ultimate achievements.*

Napoleon Hill

Vision Fitness realizes that not everyone has the space for our full-platform treadmills. So, we designed a line of folding treadmills that integrates many of the features of our larger treadmills but folds out of the way when not in use. With Vision Fitness, you don't have to sacrifice performance just because you don't have space.

Vision Fitness knows that 80% of people stop working out and do not reach their goals due to boredom. Our Smart-Matrix™ LED consoles have large LED windows for both Speed and Elevation, while providing other feedback such as Time, Distance, Calories, Average Speed and Heart Rate. Our preset motivational programming, from Muscle Toner and Fat Burner to Heart Rate Training, is sure to keep you going the extra distance. You can even design your own custom workout on many of our models. All Vision Fitness® programs allow you to adjust your speed and elevation any time during the workout without leaving the program. And, all of our treadmills offer contact heart rate feedback for an easy check of your heart rate.

4

Our easy-to-use *folding* system allows you to unfold our treadmills by simply lifting the latch and lowering the treadmill deck. It's that easy! Now you're ready for your workout. When you're done, simply lower the Elevation to zero and fold up; the locking mechanism will click into place. That's it!
Now, if only your *workout* were that easy...

The Perfect Fitness Solution...

The SPRINT 8 program found on Vision Fitness® treadmills was developed with Phil Campbell, MS, MA, and author of *Ready, Set, Go! Synergy Fitness*. Mr. Campbell is an expert in the field of anaerobic exercise, which has been cited by numerous medical publications as the cure for somatopause or the “middle-age spread.” The “middle-age spread” is the energy decline, weight-gain, loss of muscle, and wrinkled skin we experience after age 30.

Vision Fitness is the first fitness company to integrate anaerobic exercise programming (SPRINT 8) into our equipment that specifically promotes the natural release of human growth hormone. This hormone—the most powerful body-fat-cutting, muscle-toning, anti-aging substance known in science—is produced by the body during the SPRINT 8 workout.

The SPRINT 8 anaerobic program helps people of all ages and fitness levels reach their goals. Once you press the SPRINT 8 button and select your level (from 1 for beginners to 16 for elite athletes), you are launched into an effective, heart-pumping, 20-minute workout that produces instant results. The treadmill will automatically adjust the speed and elevation based on the level you selected and will notify you when they are about to change. You can adjust the intensity at any time during your workout.

Ask your authorized Vision Fitness® retailer for more information on the medical research-based SPRINT 8 program found *exclusively* on Vision Fitness® equipment.

If you don't have a vision, nothing happens.

Christopher Reeve

Customize Your Treadmill

“Why is it that I can’t get the treadmill console with the treadmill base that suits my individual needs?” That is a question we’ve been hearing recently from various fitness customers, so we configured our home treadmill frames so that they will work with any of our consoles. Simply choose the console that fits your needs and match it with the frame that offers what you want. Don’t let other treadmill manufacturers tell you what you need; only *you* know what features are most important to you.

Following are the three different Vision Fitness® consoles from which you can choose and the features available on them. Page 11 illustrates the differences in our frames. Go ahead and design the treadmill that will help you meet your specific fitness goals!

First, choose your console...

All Vision Fitness® consoles have the following key features:

- One-Touch™ Quick Start Button – Simply press and go.
- Speed and Elevation Quick Keys – Provide easy, single touch adjustments while working out.
- Two Water Bottle/Cargo Holders – One for your drink, the other for your cell phone, glasses, remote control, or MP3 player.
- Integrated Reading Rack
- Ergonomic Handlebar with Contact Heart Rate
- Easy-to-read 45-degree Console Angle
- Large, Easy-to-read LED Display
- Elevation, Time, Distance, Calories, Speed, Pace and Heart Rate Readouts

Premier CONSOLE

Water Bottle/Cargo
Holder

Speed/Elevation
Quick Keys

One-Touch™
Start Button

Integrated
Reading Rack

Ergonomic Handlebar
w/Contact Heart Rate

Our Premier console is loaded with all of the programming features you’ll need to achieve your fitness goals, from its four interactive heart rate programs to the exclusive SPRINT 8 20-minute anaerobic workout. It even keeps track of your workout totals. The alphanumeric message center scrolls easy-to-follow instructions across the window and provides motivational messages. Finally, the large multi-color dot matrix display is easy to see with our segment progress bar, which illustrates how much of your workout is complete at any give time. With this top-of-the-line console and its 16 programs, you are sure to stay engaged and motivated.

Deluxe CONSOLE

Our Deluxe console is designed for the user that wants some programming but not every top-of-the-line feature. This console has one interactive heart rate program, along with five User programs and six preset programs that include rolling hills and sprints. It also includes the exclusive SPRINT 8 20-minute anaerobic workout. The three feedback LED windows give extra data at a quick glance, and the multi-color dot matrix display is easy to understand.

Simple CONSOLE

There is a reason why we called this the Simple console. It has no programming and one large LED for easy viewing. Simply press the Start button, and you're on your way to a great workout. The smaller LED gives you your heart rate feedback from the contact heart rate bar. If you do not need any programs or additional feedback from the console, then the Simple console is your best choice.

...now, choose your frame.

Now that you know the differences between the consoles and have found the one that is right for you, you need to select the correct frame. All Vision Fitness® frames use thick, heavy gauge steel with extra supports under the frame to stop the frame from flexing under heavy load. We offer three platform versions for the home—the **T9600**, **T9500**, and **T9200** frames. We also have two folding frame options—the **T9450** and **T9250**—for customers who want to fold the treadmill out of the way after they have finished their workout.

All Vision Fitness® frames have the following key features:

- 2.5-inch Crowned Rollers – Help the system run cooler for a longer life.
- One-inch Prewaxed Phenolic Deck – Add durability and longevity.
- Non-slip Side Rails – Grip your shoes for added safety and comfort.
- Variable-durometer Elastomer Cushioning System – Eight elastomers provide cushioning and support right where you need it.
- Side Handlebars – Provide security and comfort.
- Front Transport Wheels – Allow easy movement.
- Large, Ventilated Motor Cover – Keeps the system cooler for a longer life.
- Metal End Caps – Will not break like many plastic end caps.
- Belt Guides – Help the belt track properly.

Non-Slip
Side
Rails

2.5-inch
Crowned
Roller

The **T9600** frame is our top-of-the-line frame. It incorporates our largest deck (which can be flipped to double its life), measures 60" x 20", and boasts our extra-heavy gauge steel tubing for heavier and taller users. It also has our 3.0 hp Cambridge Motor Works™ motor with a matching 3.0 hp drive system to assure smooth, consistent power, even at lower speeds. The extra-thick 4.4 mm orthopedic belt provides an extra-comfortable workout.

One-inch Prewaxed
Phenolic Deck

The **T9500** frame offers the same features as our **T9600** frame, such as the 3.0 hp motor and matching 3.0 hp drive system, along with our 4.4 mm orthopedic belt, but in a smaller workout area of 54" x 20". This frame also utilizes our standard heavy gauge tubing.

The **T9200** is our entry-level frame but has many of the same features as our **T9500** and **T9600** frames. It simply utilizes a smaller 2.5 hp motor and a standard 2-ply belt. Like the **T9500**, the workout area is 54" x 20", and the frame consists of our standard heavy gauge tubing.

The **T9450** and **T9250** folding frames have many of the same features as the platform treadmill frames. Both have the 2.5 hp motor. The **T9250** comes with our standard 2-ply belt, while our **T9450** has our extra-soft 4.4 mm orthopedic belt. The **T9250** and **T9450** also have our exclusive "drop assist" deck—the shocks help support the weight when you lift and lower the deck.

Quality CHECKLIST

Vision Fitness understands that choosing the right treadmill is an important decision and a large investment. We have provided a checklist on the next pages of some of the key quality features that you should look for in a treadmill. Always make sure you test the treadmill before you buy it and ask, "Is it simple to use? Is it well built and reliable? Is it comfortable? Will I use it?" Good luck at achieving your fitness goals!

- Heavy Gauge Steel Frame** To compare frame strength, lift the treadmills you are considering. Be careful, though, our treadmills are heavy! Make sure that there are extra braces on the bottom of the treadmill for proper support.
- Low-Maintenance Prewaxed Decks** Stay away from lower-cost silicone systems.
- Warranty** Make sure the warranty covers a Lifetime on the frame and motor, along with five years on all parts. Stay away from unknown brands that may not be around tomorrow.
- 2.5" Crowned Rollers** These rollers reduce wear on the belt and entire system; use larger, top quality bearings; and self-center the belt as you use it.
- Customizable Options** Don't let treadmill manufacturers tell you what is best for you. Build your own treadmill—one that helps you achieve your specific fitness goals.
- Quick Keys** A simple press of a button to change speed or elevation makes the treadmill much easier to operate.
- Integrated Contact Heart Rate** Make sure the treadmill has contact heart rate, so you can quickly check your pulse during your workout.
